INSTALLATION GUIDE

SKYRIM KIRBYKINGS MODLIST REQUIRED:

1. SKYRIM 1.6.1170 WITH FREE DLC.
   - ccBGSSSE001-Fish.
   - ccBGSSSE025-AdvDSGS.
   - ccBGSSSE037-Curios.
   - ccQDRSSE001-SurvivalMode.
2. Wabbajack Apps Latest Version.

NOTE:

Installing this list while owning the full paid AE is unsupported and done entirely at your own risk, however, during testing, at least one user with the full AE successfully installed the list by following these steps, so results may vary. If you own the paid AE upgrade, it is strongly recommended to back up the following folders before starting.

(Optional Backup)

- C:\Users[name]\OneDrive\Documents\My Games
- C:\Users[name]\AppData\Local\Skyrim Special Edition
- C:\Games\Steam\steamapps\common\Skyrim Special Edition

STEP BY STEP:

1. Delete the folders listed above.
2. Uninstall Skyrim Special Edition from Steam.
3. Reinstall Skyrim Special Edition through Steam.
4. Right-clicked Skyrim game in Steam, selected Properties > DLC, and unchecked the AE Upgrade.
5. Launched the game, let it run the automatic settings detection, and then clicked Play.
6. If you received a pop-up about downloading Anniversary content, exited the game using the console command: qqq
7. Download Wabbajack from this link: https://www.wabbajack.org
8. Run Wabbajack.exe
9. Log in to your Nexus Mods account (Premium is highly recommended or automatic downloads).
10. Open wabbajack gallery, then search & download Skyrim KIRBYKINGS Modlist.
11. Set the Installation Location (where the game mods go) and Download Location (where temp files go). DO NOT USE THE SAME FOLDER.
12. Click the arrow button to START.
13. Launched the game using skse64_loader.exe through Mod Organizer 2.
14. While in game, Press the "PageUp key" on your keyboard. This should bring up the Community Shaders menu and then go to post processing, and choose "Kirbykings Profile", click LOAD.
15. Enjoy then.
